You're in good company with the 1,600 healthcare and senior living organizations that have chosen TheWorxHub to simplify day-to-day operations, save time, money and improve resident satisfaction. **Check out all the ways you can save with these ROI data points.**

Work order management

Work order management in a senior living setting is challenging, with maintenance and operations teams being tasked with managing compliance, preventative maintenance, contractors and keeping patients and staff safe. Being stretched thin is the norm so opportunities to reduce workloads and create efficiencies are vital to the long-term success of all organizations.

$101,000 annual savings

or **1,408 hours** saved with improvements in work order management with mobile access, cutting down calls, simple search, etc.

$22,000 | 867 hours

in productivity gained with **50% fewer trips** back to home base with mobile

$11,000 | 455 hours

in productivity gained annually by **easily logging staff time**

Asset management

You need a system that can easily capture and access full data on every asset to help you decide the optimal time to replace an asset versus continuing to repair. In addition, managing warranties, asset risk scores, preventative maintenance and energy cost.

$24,730 annual savings

in asset management gains.

Resident billings

Resident billings for housekeeping and maintenance tasks are often missed as the current process is time consuming vs the request filled. With TheWorxHub you can simplify this process with detailed reminders that you can bill from, export, and convert to printed invoices so no charge is lost.

$11,000
additional revenue

on maintenance-related tasks and billable work orders on mobile

$47,000
additional revenue

on housekeeping-related tasks (like mattress flips, extra cleanings, custom services and deep cleans)

Work requests

When work is communicated verbally the required information is routinely incomplete and requires follow up. In addition, when front line staff can't see the status of a work order and a job isn't done within a day, they start to worry that the job has been lost, so they waste time chasing staff for updates. TheWorxHub solves this by automating the feedback loop, providing email and onscreen status updates, while ensuring those doing the work have the information they need without wasting time with follow up.

$1,900
annual savings

or **75 hours** saved with automated feedback loops

$2,000 | 80 hours

Of productivity gained
