3 Benefits of Mobilizing Community Development Operations

More than ever, now is the time to see where you can make your local government community development processes more streamlined and accessible - and SmartGov™ can help.

These are three benefits of mobilizing your operations:

Align your staff

A fully digital and cloud-based system can help improve the productivity of your staff, whether they are working in the office or remotely
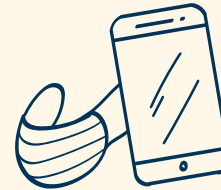

→ Work can be done on any device (desktop or mobile), whether on- or offline

→ Customizable user to-do lists to keep staff focused and organized

→ An easy way to communicate between staff and citizens

→ Hosted on a reliable platform like Amazon Web Services

Connect to citizens

Tap into the power and accessibility of an online portal for permitting, licensing, inspections and code enforcement so citizens, contractors and businesses don't have to physically come into your office

→ Online payments

→ Permits and inspections for temporary shelters, childcare centers, etc.

→ Licenses for service providers and businesses

Promote safety and social distancing

Your field staff need to keep working, but how do you keep them and citizens safe in a time of social distancing? That's where a mobile app comes in

→ Mobile app for inspectors and code enforcement officers

→ Mobile printing so they can work completely from their vehicle
